

PRESS RELEASE

CLEVOR TO PROVIDE PROJECT SCHEDULING & OPTIMIZATION SERVICES FOR TESC'S FREEZE PIPING PROJECT, A PART OF THE SHAFT PROJECT BEING UNDERTAKEN BY DMC FOR BHPB JANSEN MINE

Saskatoon, Saskatchewan, May 16, 2011 – Clevor Technologies Inc. announces that TESC Contracting Company have contracted them to provide project scheduling and optimization services for their Freeze Piping project being undertaken for DMC at the BHP Billiton's Jansen Mine.

Clevor will build and optimize the initial project plan and then update and re-optimize the plan periodically till the completion of the project.

Ravi Maithel, President of Clevor Technologies Inc. said, "We are very happy about this contract. We believe that we will be able to assist TESC's project team manage this project better both by meeting tight schedules and being able to react to the changes that can happen in projects of this type. We also hope that this will lead TESC and DMC to use our services for other projects."

About TESC Integrated Construction Services: TESC Contracting Company is a multi-disciplined contracting company offering integrated, single source contracting services to industrial, institutional and commercial clients for over 30 years.

About Clevor Technologies Inc. Clevor Technologies Inc. has developed Clevor Project Optimizer for construction projects, maintenance operations, manufacturers and professional services companies. Clevor Project Optimizer represents a true breakthrough in project management. It automatically builds a project plan that "optimizes" a given business objective. These software tools use a patent- pending intelligent systems-based high performance optimization engine developed by Clevor. These solutions provide a compelling value for their users.
