

April 20, 2006

Supreme Steel Ltd. is the largest Steel Fabricator and Erector in Western Canada and operates out of seven facilities in Alberta, Saskatchewan, British Columbia and Oregon. Supreme Steel is a 'make to order' steel fabricator serving both industrial and commercial markets. We have been using Clevor Schedule Optimizer since June, 2005 for scheduling the work undertaken by our plant at Saskatoon. This includes the work undertaken by our drafting office, purchasing, manufacturing plant, blasting and painting shops, shipping, field erection work and any work that we sub-contract to others.

I am happy to state that Clevor Schedule Optimizer enables us to produce detailed optimized schedules for all the contracts we undertake. This enables us to provide realistic completion dates to our customers taking into account all the tasks from drafting to field installation. With early schedule identification we are able to very effectively supplement our capacity by sub-contracting portions of the work to other sub-contractors when our own capacity in any area creates a bottleneck.

Clevor's rapid re-scheduling and re-optimization capability enables us to update these schedules weekly to take into account any changes that may have occurred during this period. It enables us to provide excellent 'due date performance' to our customers, which allows us to differentiate ourselves from our competitors in the minds of our customers.

Clevor Schedule Optimizer also enables us to manage our costs better so that we are able to use our resources more productively making us very cost competitive in the market place. Given the shortage of skilled manpower in Western Canada these days, it reduces the pressure on us. And, finally it gives us much better future visibility and control over our projects and commitments, enabling better coordination within our shop as well as with our suppliers and sub-contractors creating a more congenial working relationship.

Based on our positive experience, we are hoping to extend the use of Clevor Schedule Optimizer to our other facilities in Alberta, BC and Oregon.

Sincerely,

Ross Fraser  
General Manager
